SERVICE CHECKS WITH A CAPITAL 'D'

An average aircraft in scheduled traffic undergoes constant minor checks and 2-3 major maintenance checks (D-checks) during its lifespan. Roughly every six years it is rolled into a hangar and disassembled down to its component parts. A 'D' check costs over one million dollars, uses up around 25,000 working hours and could keep the aircraft out of service for up to two months.

DESIGN FOR REALITY

WHEN YOU ARE DONE DRINKING, WE TURN THE BOTTLE INTO CLOTHES

CHOOSE RECYCLED POLYESTER!

Now there's an easy way to help the environment – choose work clothes made from recycled polyester. With advanced technology we melt down used PET bottles and spin them into thread. The resulting polyester weave is extremely durable, comfortable and environmentally-friendly. The end result consists of 55% recycled polyester and 45% cotton (weight 268 g/m²).

Polyester is manufactured using oil with chemicals such as naphtha, xylenes, acids and glycol. The manufacturing process also uses a lot of energy. Recycling polyester minimises these negative effects.

There is a lot to gain from choosing recycled polyester:

90% reduction in power consumption.

70% reduction in carbon dioxide emissions.

You're making an active choice for a better environment.

And you can take things full circle when you remember to return all your bottles!

4090 1835

DURABLE COLLECTION IN RECYCLED POLYESTER

Our service collection in recycled polyester consists of a jacket, trousers and a women's trouser. The garments have a modern, functional design that offers maximum mobility and extra durability. They are perfect for the service industry, where heavy wear can otherwise reduce a garment's lifetime. By choosing garments made of recycled polyester, you also actively contribute to reduced chemical and energy consumption.

SPECIAL TRANSPORTATION AGAINST THE WIND

The biggest challenge facing a wind turbine construction is the special transportation needed to get them to their location. The tower and blades are too long, wide or heavy to be transported without exemption. The length is the greatest challenge. Most carriers manage blades up to 53 metres in length, but face a constant challenge in the ever-growing size of wind turbines. The Vesta V164 that was raised in Østerild, Denmark in January 2014 had blades of up to 80 metres in length. Talk about long-haul transportation!

CORDURA®

FRESH WITH POLYGIENE

The great thing about our UV t-shirt and polo in bamboo charcoal is that you stay fresh all day long. Not only does it dry fast and protect you from the sun's strong rays, it also filters out bad odours because the fabric is treated with polygiene technology that reduces bacterial growth. The material is perfect for hot weather and certified according to UPF 50+ Solar UV Protective Properties.

DECALS

We use heat transfers, which have sharp contours and can withstand lots of washes. Decal prices vary depending on quantity, size and the number of colours involved. Check our pricelist for current prices. Allow 2-3 weeks for delivery of new production decals.

EMBROIDERY

We offer high-quality embroidery, perfect for giving your work clothes a more professional look. Embroidery prices vary according to the number of stitches. Check our pricelist for current prices.

CUSTOM-SEWN PROMOTIONAL CLOTHING

You know that we also make custom clothes, right? You decide the pattern, material and color combination. The only requirement we have is that you order at least 1000 garments.

SMART MARKETING

DECALS AND EMBROIDERY

What would a football team be without a club logo? Offering personnel clothing with the company's own profile is a cost-effective way to strengthen both team spirit and the brand.

Blåkläder makes sure you get great-looking, integrated company clothing, and is glad to help with extra features like sewn reflective strips, regular or vulcanized kneepads. With us, it's quick and easy to place an order, and for repeat orders, you'll have your clothes in just a week.

KEEP IN MIND

In some cases, there are restrictions on marking.

- Items with taped seams cannot have decals placed over the seams (heat softens the adhesive and makes the tape peel).
- Some linings can also be damaged by decals in very high temperatures.
- On high-visibility clothing certified to EN471/EN ISO 20471, decal size is limited on various models so that the garment doesn't lose its certification.
- On embroidery in garments that are water- and windproof, the fabric will let in moisture. We therefore do not recommend embroidery on these garments. Call our sales support and check before ordering decals or embroidery.

HOW TO ORDER:

1. Send a vector EPS file.
2. Specify the colors in the logo with PMS numbers.
3. Specify the size you'd like the decal to be.
4. Specify where you'd like the decal to be on the garment.

3314
