ACTION TOURISM ON THE VOLCANIC ISLAND

On the shipyard slipway in Reykjavik's old harbour, ship maintenance has been carried out for over 100 years. The Stálsmiðjan steel forge pulls the ships up on two stocks, one 65 metres in length, the other 85 metres. The yard takes in 60 to 70 ships a year for maintenance with a docking capacity of up to 2,400 tonnes. Once on the slipway the ship shows its true size - the first task is a 3000 bar high pressure wash to remove fouling and loose flakes of paint. A thorough overhaul of a ship's hull could take months and involves blasting, surface treatment, riveting, welding and painting.

ALL-WEATHER WINTER JACKET

Wind and waterproof winter jacket with great breathability. This model has been specially designed to keep you warm and dry no matter what the weather, and has a number of technical features such as taped seams and mesh panels at the shoulder blades, underarms and collar for good ventilation. With its detachable hood, adjustable cuffs and discrete reflective detailing, it is the perfect winter jacket for working outdoors. A supermodel, you might say.

WIND, WATERPROOF
AND FULLY BREATHABLE

WIND, WATERPROOF AND FULLY BREATHABLE

The fabric in the jacket has three different layers of quilted lining (a heat-insulating lining), membrane and outer fabric. The quilted lining keeps you warm, while the membrane is a wind and waterproof layer. The outer fabric keeps you dry on the outside, which means that wind, water and snow can't get through. The three layers also allow the jacket to breathe.

EXTRA VENTILATION

The lining has mesh panels in the most exposed areas, such as the back and underarms. When you sweat, moisture is released through the mesh net and keeps you warm and dry when you're working hard.

STRETCHY SOFTSHELL

The softshell material is a pliable and stretchy fabric. Our jackets have 2-way or 4-way stretch fabric, which means you can move freely and easily and find a comfortable working position.

WIND AND WATER- PROOF MATERIAL

The jacket has three layers of fabric – an inner layer of fleece, an intermediate layer of membrane and an outer layer of softshell. The fleece layer keeps you warm, the membrane is wind and water-proof, and the outer layer repels wind, water and snow. All three layers also let the jacket breathe.

3-LAYER

3

2

1

THE 3-LAYER PRINCIPLE:

ADAPT YOUR CLOTHING TO YOUR LEVEL OF EXERTION

WHEN WORKING HARD IT'S IMPORTANT TO KEEP WARM AND DRY. THE 3-LAYER PRINCIPLE GIVES YOU THE CHANCE TO REGULATE YOUR BODY TEMPERATURE BY ADDING OR REMOVING GARMENTS AS THE WEATHER OR WORK REQUIRES.

TRANSPORT - LAYER 1

This layer wicks away moisture from the skin. An undergarment of wool or channel-stitched synthetic material absorbs moisture and wicks it away. Wool also regulates body temperature well. In cold weather it warms, and when the body heats up it cools. That means it is perfect to use even in clothing for warm environments.

Wool is somewhat self-cleaning. The wool's natural creatine eliminates foul-smelling bacteria, so that the garment stays fresh longer.

INSULATE - LAYER 2

The intermediate layer insulates while wicking the moisture further away. As the temperature drops, the intermediate layer insulates against cold and lets you maintain your body heat. If you get hot and sweaty, regulate your temperature by lightening your intermediate layer. Put on a flannel shirt, a fleece garment or an artificial fibre undergarment.

Our fleece garments combine style and function. Fleece warms when it's cold. It's also easy to wash, dries quickly and wicks away moisture from the body.

PROTECT - LAYER 3

This is the shield that protects you from cold, rain and wind.

The breathing function releases moisture from inside so it can evaporate on the outside.

The material is lightweight, easy to care for, has taped seams and an especially durable surface layer.

Real outerwear for hard work should have: Hidden cuffs at the end of sleeves and legs/Snow locks over zips/Spacious, easy-access outer pockets/Warming fleece lining in front pockets/Drawstring for adjustable waist/Removable lining/Zip all the way up the collar.

HAT, SHOES & SOCKS

They say it's probably a myth that you lose most of your body heat through your head. But myth or not, it's still extremely important to apply the 3-layer principle on the head, too. The scalp has lots of sweat glands and if there's anywhere you want to be dry and warm, it's your head. If your feet become cold and wet you will freeze no matter what you have on the rest of the body. We recommend you wear functional socks that breathe and wick away moisture from the skin. Choose a shoe that matches your profession and the time of year. In addition to protecting against water and oil, the shoe should be able to breathe, which is why leather shoes are recommended rather than synthetic. Shoes should never dry close to a heat source, make sure you have at least two pairs of shoes so that one pair is always clean and dry when you need to go out to work.

UNDERWEAR SYSTEM

TECHNICAL BASE LAYER

MATCH CLOTHES TO EXERTION. Blåkläder has developed a new collection of base layers called UNDERWEAR SYSTEM. This unique collection gives you superior insulation with moisture-transpiring properties that keep you warm and dry in all types of work conditions. Soft and comfortable with a body-hugging fit, the fabric insulates you while still effectively transporting moisture from the body to the next layer. Dress right – and start from the bottom with a base layer from Blåkläder.

XWARM °C  - 20
- 35

4894/1894

UNDERWEAR SYSTEM

1706 70% Merino wool, 30% polypropylene, terry knitted, wicking, moisture management, 275g/m²

This multi-functional clothing has everything one could ask of a base layer. XWARM regulate your temperature while keeping you warm and dry even in extreme cold. The material consists of an inner layer of channel knitted polypropylene which transport humidity away from the body and to the outer layer, where it is absorbed by the merino wool. Keep warm and stay dry during e.g. stationary work in biting cold.

WARM °C  - 5
- 30

4891/1891

UNDERWEAR SYSTEM

1705 50% Merino wool, 50% polypropylene, rib knitted, wicking, moisture management, 235g/m²

A synthetic underwear's moisture transporting qualifications are being combined with the heat insulating capacity of the merino wool in this garment with two functions. This warm underwear top is produced in two layers ensuring the moisture to be transported away from the body to the outer layer, where it will be absorbed by the finely-fibred merino wool. Perfect for use during colder days.

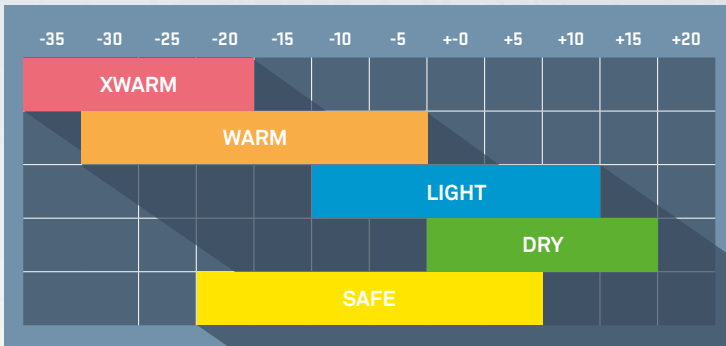

WARM °C  - 5
- 30

4899/4897/1849

UNDERWEAR SYSTEM

1732 100% Merino wool, 180g/m²

This warming base layer keeps the body warm and dry during cold weather. Warming zones located on shoulders, arms, back, behind and sides where you freeze the most. The base layer is made of 100% merino wool that provides superior insulation and humidity transportation qualities to keep you warm and dry. Don't freeze while working, keep warm and dry in cold environment.

XWARM fabric and design developed for the most extreme cold conditions. Can also be worn as a 2nd layer (L2) in combination with DRY. WARM keeps you warm and dry in cold conditions. LIGHT comes in handy when it starts to get colder and you need a base layer that keeps you warm and dry. SAFE flame-resistant technical underwear that keeps you dry and fresh all day.

SAFE °C  +5
-20

4898/1898 UNDERWEAR SYSTEM

1725 59% modacrylic, 39% cotton, 2% antistatic, rib knitted, flame retardant, antistatic, 220g/m²

Our base layer SAFE is made of an advanced heating and flame tolerant material that solidifies at high level of heat and creates a permanent protection. Certified according to EN 11612 (A1, B1, C1), EN 1149-5, EN 61482-1-2 (Classification 1). Feel safe, secure and protected while working. Carry SAFE. For more information about SAFE, page 84.

LIGHT °C  +10
-10

6810 UNDERWEAR SYSTEM

1707 100% polyester, rib knitted, wicking, 170g/m²

The base layer LIGHT effectively transports humidity away from the skin. The singlet and the long under pants are made of polyester that is soft on the skin and keeps the body warm, dry and comfortable in all types of physical activity. The channel knitted fabric creates an air gap between the body and the clothing, increasing the insulation. Usable during all seasons, when you need functional breathability next to the skin.

DRY °C  +15
+0

4999/1839 UNDERWEAR SYSTEM

1052 55% Polyester, 38% Polyamide, 7% Elastane, single jersey tubular knit, wicking, anti odour by bamboo charcoal, 170g/m²

DRY is our most comprehensive base layer. The unique polyester fiber with bamboo charcoal makes the clothing quick drying and odourless. Integrated mesh panels for extra ventilation in major sweat zones. Keeps you dry during physical work.

DOWN TO THE BARE HULL

With the rough Icelandic terrain it comes as no surprise that Icelanders have become masters of off-road vehicles, helicopter tours and shooting the rapids. It started when emergency services and military vehicles had to navigate from a-to-b through a maze of nooks, crannies and beaten tracks on the island. With a threefold rise in tourism during the past ten years, the extreme tours have naturally become a lucrative business. More and more people are taking off in helicopters, ATVs, tracked vehicles and snowmobiles across the dramatic landscape, which is truly out of this world.
